Recognizing the career pressure, research momentum, and the interest by some researchers to continue their work while also managing early childcare needs, NSERC provides the following option within its Family and medical leave policy for grantees:

Individuals who become primary caregivers immediately following the birth or adoption of a child, during the tenure of their Discovery Grant (DG), Individual Subatomic Physics Discovery Grant (SAPIN) or Discovery Development Grant (DDG), and who are eligible to take extended maternity, parental or adoption leave through the institution that administers their grant, but decline taking the leave, may be eligible to receive a one-year grant extension with funds at a level up to but not exceeding the current grant amount.

This policy applies only to grantees holding a DG, SAPIN or DDG.

Policies and requirements of the Tri-Agency Guide on Financial Administration, and the Terms and Conditions of the existing DG, SAPIN or DDG, apply to grant extensions approved under this policy.

Principles

- To be eligible for a one-year DG, SAPIN or DDG extension with funds under this policy, grantees must be the primary caregiver immediately following the birth or adoption of a child and be eligible for but do not take extended leave (maternity, parental or adoption).

- The grant extension when declining extended maternity, parental or adoption leave will be considered only within the first year following the birth or adoption of a child. Should grantees take extended parental leave during the second year, they may request a grant extension with funds for the second year under the NSERC Family and medical leave policy. The grant extension under the policy is included within the two-year limit set out in the NSERC Family and medical leave policy.

Process

The following documents must be submitted to NSERC at least 30 days prior to the date when the grantee is eligible for taking extended maternity, parental or adoption leave (see also Effective Date of the Policy):

- A signed letter from the grantee confirming
  - the application number of the grant and the title of the grant;
  - the period (start and end dates) during which the grantee is primary caregiver immediately following the birth or adoption of a child and has been declared eligible by the institution for taking extended maternity, parental or adoption leave;

Updated: October 2022
that the grantee declines taking the leave;
and
requesting a one-year grant extension with funds;
justifying the need for the additional grant instalment.

- A signed letter from the appropriate authorized official at the institution confirming
  - the application number of the grant and the title of the grant;
  - the period (start and end dates) during which the grantee is primary caregiver immediately following the birth or adoption of a child and has been declared eligible by the institution for taking extended maternity, parental or adoption leave;
  - that the grantee declines taking the leave;
and
  - endorsing the amount requested by the grantee.

- A Grants in Aid of Research, Statement of Account (Form 300) as of the date the grantee is eligible for taking extended maternity / parental / adoption leave.

NSERC must be notified immediately if there is any change in the recipient’s eligibility to receive the supplement.

Effective Date of the Policy

The policy on Primary caregivers who are eligible for but decline taking extended leave (maternity, parental or adoption) has been in effect as of March 1, 2016. Grantees cannot request a grant extension for a period of declined leave which precedes March 1, 2016.
